DETAILED ACTION

Response to Amendment

- 1. Amendment filed September 29, 2010 has been entered.
- 2. Applicant's arguments filed September 29, 2010, have been fully considered but they are not found persuasive.
- 3. Claims 2-3, 6-7, 9-10 have been cancelled. Claims 1, 4-5, 8 and 11-21 are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 5 and 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kiss et al. (Assay and Drug Dev. Tech., 2003) in view of Morgenstern et al. (Nucleic acid research, 1990).

Kiss et al. disclose Herg channel expressed in cells using pcDNA3.1 vector in a high throughput patch clamp system (page 128). The current is greater than 0.6 nA and the success rate is greater than 79% (figures 1-2; page 130). Table 1 disclose the results of inhibitor effects on the assay of channels (pages 128, 131-134; figures 4-5). The pcDNA3.1 comprises fragments of SV40, M13, CMV, and EBV virus and thus is not excluded as a viral vector. It should be noted that claims 1-7 are product claims and the product by process and function limitations are inherently taught by Kiss et al. Kiss et al. does not teach a cell population transferred with a retrovirus vector.

Morganstern et al. disclose gene transfer with retrovirus vector (pages 3587-3589).

It would have been obvious to one of ordinary skill in the art at the time of the invention to express the herg channel of Kiss et al. using the retrovirus vector of Morganstern et al. One of ordinary skill in the art would have found it obvious to use the retrovirus vector because it was a well know vector and efficiently transferred as indicated by Morganstern et al. (page 3587, second column, second paragraph).

Application/Control Number: 10/595,858 Page 4

Art Unit: 1646

Applicants argue that the prior art does not teach a population of hERG expressing cells where 40% or more of the total hERG transformed cells with an hERG current of 0.6 nA or more. However, claims 5 and 20-21 do not require the 40% claim limitations.

5. Claims 1, 4, 8, 11-19 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
